

LINES LET LOOSE Meredith Rosier

Supply List

"A line is breathless length, a straight line is a line that lies evenly with the points on itself."
Euclid, *Elements*, c. 300 B.C.

"I discovered the charm of the line in and of itself-the line in space as well as the line drawn on a surface, and the nothing between the lines and the sparkling when they cross, when they are interrupted, when they are of different colors or types. I discovered that sometimes then between the lines is as important as the line by itself."
